

# SAFE-T-BOT 45

## Robotic scrubber-dryer for cleanroom floors

### Exceed cleaning standards in cleanroom environments

The SAFE-T-BOT 45 is a robotic scrubber-dryer designed specifically for cleanroom environments. Combining intelligence and efficiency, it's designed to deliver outstanding cleaning results in environments where contamination control is critical.

### Savings per 500 m<sup>2</sup> vs. other manual machines

Electricity  
75%

Water  
60 liter

Time  
90 min

### Technical specifications

Filter  
HEPA 12

Run time  
up to 3h with  
1x iPower 20C

Practical  
performance  
up to 700 m<sup>2</sup>/h

\*in open areas, this varies by environment

### Why SAFE-T-BOT 45?

#### Faster

Automation for faster cleaning of floors with less human effort.

#### Cleaner

ISO Class 5 compliance: The machine meets stringent cleanroom requirements.

#### Greener

Cuts waste: less disposable cleaning material, only a little water, no detergents.

#### Safer

Battery-powered so no hassle with cables and no fall or knock-over danger.

#### Better for everyone

Outsource repetitive cleaning work to a co-bot and save yourself time for other tasks.

# Why SAFE-T-BOT 45 is your choice:

## You're in control

A smart robotic machine, but you decide when and how it works

## Relieves cleaning staff:

it cleans hallway floors autonomously

## Never miss a spot

Stores every spot in memory: never gets lost, even on occupied floors

## Advanced technology

Equipped with advanced sensors and a smart app

## 1. Stop button

Stops instantly when needed

## 2. Handle

Manually steer the co-bot to any location

## 3. Easily accessible

Refill or empty the tank

## 4. Sensors

Ensures thorough coverage without missing spots

## 5. Click in squeegee

Fast and easy to replace

## 6. HEPA 12 filter

For outgoing air: reduces contamination risks

Saves time

No detergents needed

Uses less water

Uses less power

M25.000088.01.EN - Subject to change.

## SAFE-T-BOT 45 special features:

HEPA 12 filter ensures outgoing air meets strict cleanliness standards

Never gets lost or misses a spot: even with temporary obstacles

Relieves operators by handling repetitive cleaning in corridors
